

American Manufactured Structures and Services (AMSS) as Part of the Serco Team Awarded Position on \$4.1 Billion U.S. Army Communications Multiple Award IDIQ Contract

February 14, 2014 – American Manufactured Structures and Services (AMSS), as part of the Serco team, will participate in the award of a new multiple award ID/IQ contract to provide global communication systems for the U.S. Army. Serco was selected as one of 12 companies to compete for tasks on the Communications and Transmission Systems (CTS) contract. The Serco team will provide design, procurement, installation and testing services in support of delivering global, mission-critical communication systems. The team will utilize its experience in the areas of engineering, Operations & Maintenance (O&M), and lifecycle management services to provide more secure, operationally reliable, and sustainable network communications solutions for the United States' expeditionary Warfighters. AMSS intends to provide design, manufacturing, and installation of modular and containerized communication shelters in support of the overall team effort. The contract vehicle has an overall ceiling value of \$4.1 billion over a five year period.

"AMSS is thrilled to be a part of the Serco team on this important contract for the US Army. We look forward to providing a multitude of critical communications products and services in support of the IDIQ contract.", said Alan Rand, Director Sales and Business Development.

Serco provides communication system solutions to the U.S. Air Force and U.S. Navy. Utilizing its Command, Control, Communications, Computers, Collaboration and Intelligence (C5I) expertise, the Company delivers engineering, systems integration, hardware procurement, software development, technical support, installation and testing, operations and maintenance solutions.

About AMSS: American Manufactured Structures and Services was founded with a singular focus to provide mission critical facilities to the Federal Government and communications industry sector. AMSS offers a leadership team with a combined 60+ years of Federal Government and communications design and construction experience. Facilities produced by AMSS include forced entry/ballistic/blast modular office buildings, tactical communication shelters, and custom/prototype structures fabricated from ISO containers. Services provided by AMSS include existing office building modifications/renovations, facility maintenance, modular consulting, logistics, system integration, and modular facility relocation. More information about AMSS can be found at www.amsands.com.
